Authorization for this examiner's amendment was given in a telephone interview with Keith Chanroo, Reg. No. 36,480 on 6/22/2006.

The application has been amended as follows:

Claim 1. (Currently Amended) A method of propagating signals on programmable interconnect in a programmable logic device, the method comprising:

selecting by a selection device between source signals to drive a shared programmable interconnect portion located on the programmable logic device; and

coordinating latching of the source signals in corresponding capture devices via a time multiplexing signal generator coupled to the selection device and the capture devices ; and

providing one of the source signals from the time multiplexing signal generator to one or more flip flops without a clock delay.

2. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims, the cited prior arts fail to teach providing one of the source signals from the time multiplexing signal generator to one or more flip flops without a clock delay, as required by claims 1 and 13; and the cited prior arts also

fail to teach a first one of the signals is latched to a first one of the capture devices during a first phase of the time multiplexing signal and a second one of the signals is latched to a second one of the capture devices during a second phase of the time multiplexing signal, as required by claim 10.

3. Claims 1-5 and 8-22 are now in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
